

Credit Name: CSE 2140 2nd Language Programming

Assignment Name: Mastery Exercise 5 - Grade

## Error Log Entry

What error message did you encounter (if any)?      Its not a error message but I couldn't enter a decimal percent like 85.5. I can only eneter whole number.

What unexpected behavior did your program exhibit?      No unexpected beaviour but I couldn't enter a decimal percentage

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)      It was a run-time error, logic error, and incorrect function usage.

Include a screenshot of specific lines of code.

```
double percentage = (double) input.nextInt();
```

How did you fix the issue?      I removed the double in the brackets

Provide the corrected code or solution using a screenshot.

```
double percentage = input.nextDouble();
```
