

Credit Name: CSE 3120 Object-Oriented Programming 1  
Assignment Name: Chapter 7 Mastery #2 - DiceRollGame

## Error Log Entry

What error message did you encounter (if any)? I got an unreachable code message

What unexpected behavior did your program exhibit? Not any big issues, just the error message and I added a (Thanks for playing!) and (Final score: \_\_\_\_ ) output

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) This issue is caused by a compile-time error

How did you fix the issue? The problem I put a semicolon (;) on the if statement \*if (risk == -1);\*

Provide the corrected code or solution using a screenshot.

```
if (risk == -1)
{
    break;
}

if (risk > player.getPts())
{
    System.out.println("You cannot risk more points than you have!");
    continue;
}
```

Include a screenshot of specific lines of code.

```
if (risk == -1);
{
    break;
}

if (risk > player.getPts())
{
    System.out.println("You cannot risk more points than you have!");
    continue;
}
```
