

Credit Name: CSE 2110 Procedural Programming 1

Assignment Name: Nim Game (Nim)

### Error Log Entry

What error message did you encounter (if any)? It wasn't a error message but it was a problem

What unexpected behavior did your program exhibit? The problem was one of the variables AI/I used was never called on because it was just to discard non-integer token (a invalid input).

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) It was a unused local variable

Include a screenshot of specific lines of code. `String garbage = input.next();`

How did you fix the issue? I fixed the issue by not even applying it to a variable. I just did input.next();

Provide the corrected code or solution using a screenshot. `input.next();`
